EDUCATION

AISSMS College of Engineering, Pune

2021 – 2025

Bachelor of Engineering in Computer Engineering

CGPA: 8.55

R.R. Shinde Jr. College

2019 – 2021

Higher Secondary Education

Percentage: 83.17%

SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks & Libraries: Spring Boot, Spring Security, React.js, Node.js, Express.js, JPA/Hibernate, HTML5, CSS3, Tailwind CSS, Socket.IO, OpenCV

Databases & Tools: MySQL, PostgreSQL, MongoDB, Git, GitHub, Postman, Maven, Vercel

EXPERIENCE

Software Engineer at Cognizant | *Programmer Analyst*

July 2025 – Current

Client: Merck KGaA

Pune, India

- Built and enhanced enterprise web applications for Merck KGaA using Java, Spring Boot, React.js, and SQL.
- Developed RESTful APIs and integrated them with React frontend components for seamless client-server data exchange.
- Collaborated with cross-functional teams in an Agile environment to analyze requirements, resolve defects, and deliver features.
- Participated in code reviews, unit testing, and debugging to maintain application stability and code quality.

Intern at Cognizant | *Contractor*

March 2025 – July 2025

- Assisted in developing, testing, and debugging enterprise applications using Java and Spring Boot under senior developers.
- Gained hands-on experience with React, REST APIs, Git, and Agile practices.

PROJECTS

AI-Powered Leave & Workforce Management System

- Built a full-stack HR system with role-based access (Admin, Manager, Employee) using JWT, Spring Security, and BCrypt encryption, achieving 0% unauthorized data access.
- Integrated OpenAI API for an AI chatbot answering real-time leave-balance and availability queries, cutting manual HR queries by 40%.
- Built automated email notifications via JavaMailSender and role-specific React dashboards with leave trends and availability charts.

Discussion Forum

- Built a full-stack MERN discussion platform with a Node.js/Express REST API and Mongoose-modeled MongoDB collections.
- Integrated Socket.IO for real-time updates on new discussions and replies.
- Structured separate client/server codebases with CORS and dotenv configuration, and deployed on Vercel.

AI-Based Intelligent Traffic Management System

- Co-developed an AI-based adaptive traffic signal system using YOLOv8 and CNN for real-time vehicle detection, improving traffic flow by 31.05% over fixed-time signals.
- Reduced average waiting time by 40% during rush hours and cut low-density lane wait times by 50%, eliminating lane starvation.
- Built an emergency/accident detection pipeline enabling automatic “green wave” signal priority and real-time alerts; co-authored the findings as a published paper in JNRID, Vol. 3, Issue 6, June 2025.

ACHIEVEMENTS & CERTIFICATIONS

Cheers Award – Cognizant, 2026, for outstanding contribution and collaboration on the Merck KGaA US project

The Complete 2024 Web Development Bootcamp by Udemy ([Certification](#))
